### **BCTV Access Channel**

On August 9, 2011, Cox Cable transitioned its government channels from an analog to a digital format.

Those customers with a cable box will still be able to view BCTV on Channel 2. For those customers without a cable box, BCTV can now only be viewed on Channel 116.7.

Customers must have a TV that has a clearQAM tuner, included in most new TVs. Cox Cable subscribers on the lowest tier will be able to access Channel 116.7 although their previous programming did not contain channels over 100.

For customers who do not have a television that contains a clearQAM tuner and who wish to access BCTV, Cox Cable is willing to provide a converter box at no charge for six months. After the initial six-month period, an additional charge would be imposed.

For residents who wish to oppose the migration, Clark County has set up a complaint line at 455-8888, or they can contact the City Clerk's office at 293-9208 for more information.
